

## ZENER DIODE

ZENER VOLTAGE RANGE: 2.7 --- 330V  
PEAK PULSE POWER:2000mW

### FEATURES

- Low Reverse Leakage
- Low Zener Impedance
- High Stability and High Reliability

### MECHANICAL DATA

- Case: SMA
- Polarity: Color band denotes cathode end
- Mounting Position: Any

## MAXIMUM RATINGS AND CHARACTERISTICS

Ratings at 25°C ambient temperature unless otherwise specified

Parameters	SYMBOLS	VALUE	UNITS
Power Dissipation@TL=75°C	Pt	2.0	W
Forward voltage@IF = 200 mA	VF	1.2	V
Thermal resistance junction ambient(Note 1)	Rθ (ja)	25	°C/W
Junction Temperature and Storage Temperature Range	TJ,TSTG	-55~+175	°C

Note:1.Valid provided that leads at a distance of 9.5mm from case are kept at ambient temperature

## Electrical Specification (TA@25°C unless otherwise specified)

## RATINGS AND CHARACTERISTIC CURVES

### Electrical Specification ( $T_A@25^\circ\text{C}$ unless otherwise specified)

- NOTE:
1. Standard Zener voltage deviation of 10%; additional standard "5" of the selected type, the deviation of 5%.
  2. The Zener impedance is from an AC voltage of 60 seconds, resulting in a DC voltage ( $I_{ZT}$  or  $I_{ZK}$ )% of the AC current with a root mean square equal to 10% of the  $I_{ZT}$  or  $I_{ZK}$  stack.
  3. Where the maximum zener current value is not absolute, in the actual steady-state applications, should ensure that the voltage and current product does not exceed the rated power value.
